

Sharing Session on Automotive

The automotive industry plays a pivotal role in Malaysia's economic growth and technological progress. To help develop skills and knowledge in this field, Dr. Ahmad Syahid A. Fawzal, in collaboration with TalentCorp, will be sharing his insights with Malaysian students.

Dr. Ahmad Syahid A. Fawzal is a highly experienced computational fluid dynamics engineer, with a diverse background spanning the automotive, energy, and oil & gas industries. He holds a Ph.D. in Mechanical, Automotive, and Manufacturing Engineering from Coventry University and is known for devising the groundbreaking "Fawzal Number," which optimises the cooling system of supercars.

In this session, participants will have the unique opportunity to delve into the intricacies of automotive design. Dr. Syahid will demonstrate how to use simulation software to design a car, explain the function of each component, and share valuable tips for aspiring automotive engineers looking to break into the industry.
